

A career induction training seminar was organized for the 2019 graduating class on Monday 7th October 2019.

The training was high-voltage involving speakers from several areas of Pharmacy practice who have been successful in their careers offering guidance to the students on how best they can be prepared for the job market.

This included speakers from The Mater Hospital, PSK, PPB, the Ministry of Health and other private players like Novartis, Dawa Limited and Loreal Cosmetics.

The training was a good platform for equipping the students with the necessary skills they will need to practice Pharmacy after school. Similar sessions have been organized monthly in 2020 as seen on our calendar of events.
